

## SYLLABUS

### PHZ 6355, ELEMENTARY PARTICLE PHYSICS 1

Instructor: Prof. Guenakh Mitselmakher, Office: NPB 2021, phone 352-392-5703  
Email: [mitselmakher@phys.ufl.edu](mailto:mitselmakher@phys.ufl.edu), office hours: after the class or by appointment

This two-semester course is designed to give an introduction to the history of ideas, basic experimental and theoretical concepts and major experimental discoveries that emerged from the ultimate quest for understanding the most fundamental constituents of matter and the primary forces of nature.

This two-semester course gives a preliminary understanding of a broad spectrum of concepts of experimental high-energy particle physics. The second part, PHZ 7357 ELEMENTARY PARTICLE PHYSICS 2 (to be given in the next semester), present the subject in more depth.

Topics to be covered in the first semester (PHZ 6355). May be modified depending on the interests of the students.

- Very brief Summary of the Standard Model.
- Natural Units
- Relativistic kinematics
- Perturbation theory: rate of transitions and scattering amplitude
- Particle lifetime, decay width, branching ratios.
- Interactions via an exchange with particles
- Particle Accelerators. Fixed target machines and colliders. Large Hadron Collider.
- Interaction of Particles with Matter
- Particle detectors
- Examples of large detectors
- Brief introduction to statistics. Data Analysis basics
- Discoveries of the first Particles: electron, proton, photon, neutron
- Relativistic Quantum Mechanics: Klein-Gordon, Dirac equations
- Antimatter, discovery of positron, antiproton, antineutron
- Yukawa particle. Great confusion: discovery of muons. Discovery of pions.
- Neutono hypothesis. Fermi model of beta-decay. Discovery of different types of leptons. Particle generaions.
- Strange Particles. Resonances
- Three Quarks: u,d,s. First ideas and Experiments.
- c,b,t quarks. How many generations are there?
- QED, QCD and Electroweak. Development of the Standard Model
- Discovery of the Higgs Particle. Is it the end?

**Recommended textbook:** Particle Physics, B.R. Martin & G.Shaw, 3<sup>rd</sup> edition, John Wiley & Sons

**The lecture notes:** <http://www.phys.ufl.edu/~korytov/tmp4/lectures/>

**Sample HW problems** (the HWs may include some of these problems, as well as additional problems and some problems from the textbook:

<http://www.phys.ufl.edu/~korytov/tmp4/HW/>

**GRADING.** Grades will be based on your homework assignments (one HW every two-three weeks), two partial tests (one in the middle of the semester, one in the end) and quick quizzes in class. The tests will be 20% of your grade each, the homework 50%, and in class quick quizzes 10%. There will be bonus questions in the HW and tests.

Late homework:

- -50% (within 7 days)
- homework overdue by more than one week will not be graded and no makeups will be possible except extraordinary circumstances

Your final grades will be based on the percentage from the maximum possible total score:

<b>A</b>	80% of max
<b>A-</b>	75% of the max
<b>B+</b>	70% of max
<b>B</b>	65% of max
<b>B-</b>	60% of max
<b>C+</b>	50% of max
<b>C</b>	40% of max
<b>D</b>	20% of max

For additional details regarding grading policies see the university web site:  
<https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

**Requirements for Class attendance and make-up** exams, assignments and other work in this course are consistent with the university policies that can be found at:  
<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>

**Students with disabilities** requesting accommodations should first register with the Disability Resource Center (352-392-8565, [www.dso.ufl.edu/drc/](http://www.dso.ufl.edu/drc/)) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation.

Students with disabilities should follow this procedure as early as possible in the semester.

**Students are expected to provide feedback** on the quality of instruction in this course by completing the online evaluations at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results/>

**UF students are bound by The Honor Pledge** which states “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. The Honor Code can be found here: <https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/>

### **Counseling and Wellness Center**

Contact information for the Counseling and Wellness Center:

<http://www.counseling.ufl.edu/cwc/Default.aspx>

(392-1575), and the University Police Department: (392-1111 or 911 for emergencies).
