

Undergraduate Research Experience Opportunity

A self-motivated undergraduate student is sought for a compensated (*up to \$20 per hour*) research experience on a project funded by the National Science Foundation. The research experience will consist in the exploration of water level data to identify anomalies on storm surges produced by extreme atmospheric (winds and barometric pressure) forcing, such as hurricanes and nor'easters.

The student will be expected to dedicate up to *10 hrs per week* in this activity, starting on September 1st, 2013. The duration of the activity is one semester, renewable to a second semester.

Applicants should have background in any physical science but preferably in Fluid Dynamics, Physics, Math, Meteorology, Oceanography, Environmental Sciences, or any Engineering Discipline. Interested students should send an email message to Arnoldo Valle-Levinson (arnoldo@ufl.edu) and Maitane Olabarrieta (molabarrieta@ufl.edu) with a one-page resume by August 27th, 2013.
