

PHY 2053 - Physics I

Spring 2004

- Times:** WF 2nd,3rd Period (9:35 - 10:25am) in NPB 1220
- Instructor:** Prof. David Reitze
- Office:** NPB 2265
- E-mail:** reitze@phys.ufl.edu (most effective way of getting to me)
- Telephone:** 392-3582
- Office hours:** TW, 10:30 - 11:30 am, in NPB 2265, or by appointment
You are also welcome to go to office hours of any of the recitation instructors. Prof. Sikivie will provide a list of instructors and office hours on the web.
- Description:** The purpose of this recitation class is to apply the concepts learned in PHY2053 to the solution of physics problems. Your success in PHY2053 is based in very large part on your ability to solve problems correctly and efficiently. In the recitation classes, we will learn how to solve problems similar to those that will appear on the exams. You should attend all the recitation classes and work through all the suggested homework problems.
- Grading:** The recitation class will constitute 20% of your grade in PHY2053. Your recitation class grade is based exclusively on quizzes given during class once a week. There will be thirteen quizzes. I will drop your three worst quiz grades, and average the remaining ten.
