Course Websites
The physics department PHY2053 website at
http://www.phys.ufl.edu/courses/phy2053/sum15/
will contain the course schedule, lectures, announcements, homework information, and past examinations. The University of Florida Canvas e-Learning PHY2053 website at
https://lss.at.ufl.edu/
will contain quiz grades, exam grades, and exam solutions. Online homework through the McGraw-Hill Connect system at
http://connect.mheducation.com/class/c-parks-summer
Hyper-interactive Teaching Technology (HITT) clickers is discussed on the physics website at
www.phys.ufl.edu/~hitt

Course Instructor
Mr. Charles Parks – Phone 392-0516, email:parks@phys.ufl.edu, Office NPB 1227A. Office hours Tuesday and Thursday period 5 (2:00-3:15) or by appointment. Study halls Wednesday and Thursday 6:30 to 8:30.

Textbook
Physics, Volume One, 2nd Edition, Authors: Giambattista, Richardson, and Richardson, published by McGraw-Hill. The course will include all the material from Chapter 1 through Chapter 12. The text includes a code used for the required on-line homework graded through Connect.

McGraw-Hill Connect Homework
Homework will be collected through the Connect system. The problems and their due dates will be posted on the course website. The lowest 10% of grades will be dropped.

Canvas Assignments
There will be a series of assignments given through Canvas. Questions will be taken from the textbook and lectures. The lowest 10% of the grades will be dropped. Because grades will be dropped, no make-ups will be given.

Discussion Quizzes
There will be a series of handwritten quizzes given in your discussion sections. No formula sheets or notes will be allowed on a quiz.

Examinations
There will be three mid-term exams and a comprehensive final. You can bring any information you can write on notebook size sheet of paper to a mid-term exam. This can include equations, problem solving strategies, and sample problems. The information must be handwritten. You can bring three formula sheets to the final.
Exam Schedule
Mid-term 1  Tuesday June 9  Chapters 1-5
Mid-term 2  Tuesday July 7  Chapters 6-8
Mid-term 3  Thursday July 30  Chapters 9-12
Make-ups*  Tuesday August 4
Final exam  Thursday August 6  Chapters 1-12

*Provided only for exams missed for a documented reason. Any documentation must be verifiable. For example, a doctor’s note must have a telephone number.

Hyper-interactive Teaching Technology (HITT) Bonus
There will be a series of short quizzes on the topic of that day’s lecture using the HITT clicker system. You will receive 5 points for a correct answer, 2 points for an incorrect answer, and 0 points for missing the quiz. Since HITT quizzes are extra credit, no make-up quizzes will be given and none of the quizzes will be dropped. Registration of smart devices and related information is at http://www.phys.ufl.edu/~hitt

Example percentage drop calculation
In several places above, a percentage of your grades will be dropped. Here is an example of how it will work.

Suppose there are 100 homework problems assigned and the bottom 10% are dropped. That will be a total of 100 points possible from homework. Dropping 10% means that your grade will be out of 100 − (0.10)(100) = 90 points. If you have a total of 80 points from your homework, you would receive (80/90)(5) = 4.44 points. Normal rounding rules will be applied. A score of 4.44 rounds to 4.4 and 4.45 rounds to 4.5.

You cannot receive more than the maximum points for any portion of the course.

Grading

<td><strong>105</strong></td>
</tr>
</tbody>
</table>

Grading scale
Final grades will be determined by a fixed grading scale. No grading curve will be employed. The overall scale is based on a total of 100 points with HITT quizzes adding an additional 5 points bonus. You cannot get more than 100 points.

**Honor code**
The UF Honor Code applies to all aspects of this course. It is required that you report any possible infractions to the instructor immediately. Violations will be prosecuted to the fullest extent.

**Students with disabilities**
Students requesting classroom accommodation for disabilities must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the instructor when requesting accommodation. Tests will be administered at the Accommodated Testing Center by the Disability Resource Center.

**How to succeed**
This should be obvious.
- Come to class.
  - Skipping lecture and discussion will hurt your education. Physics is hard to learn on your own. Skipping will also cost you quiz points and HITT points.
- Come to class prepared.
  - Read the book before coming to class. Review your notes from the previous class.
- Read the book and work through the examples.
  - The book is the primary teaching tool. Don’t just use your book for the homework problems.
- If you are having trouble, get help.
  - Go to office hours or seek outside help. It is very hard to catch up once you get behind in this course.
- Try to do a little physics every day.
  - Trying to learn all the physics just before an exam is a bad idea. It never worked for me.
